Unit Tweak Well-Trained

Unit Total 800pts

Crockett Vibroknife

Tac Sergeant Marek has made a name for himself leading a crack team of troopers in numerous missions against the Mutants. Known as Marek's Marauders, the unit is composed entirely of veterans with significant experience fighting in the Hot Zones. Tac Corporal Valanse, the Marauder's second-in-command, is an accomplished tracker and allows them to follow bands of Mutants that have hit a Megacom firebase back to their lairs and either eliminate the lawless creatures themselves or quide larger forces to the zone if needed.

As listed above, the unit is perfect as the point unit of a larger force, especially when the enemy is made up of Mutants deploying Prowler-led Dog Soldiers, where Corporal Valanse can spot the Prowler and the rest of the unit can eliminate eradicate the hostile forces.

We have left out Tac Gunners from this elite force, but the addition of up to three of them picked for maximum value depending on the mission should make this unit a strong core for your force. Alternatively, by eliminating all the added tweaks (all but *Sole Survivor* and Valanse's *Chain of Command*) and Hero Points from the above, the box can be deployed as a bare-bones Tac Trooper unit for 700 points, still a solid basis for a Megacom force.
